

Design Elements Worksheet

Navigation / Tabs

- Look and feel
 - Fonts
 - Colors
 - Shapes

Design Elements

- Navigation elements RGB or HEX CODE number for colors needed for Alison
- Page/site elements RGB or HEX CODE number for colors needed for Alison
- Portlet elements RGB or HEX Code number for colors
- Default font and font size
- Main color theme
- 5 alternative color themes
- A standard theme and a compact theme (slender font, and for use when there is a bunch more content).
 - What can she do as far as a responsive design? Curious to know. Ellucian roadmap has this for fall 2014 to be baseline.

Graphics

- BTC will prepare graphics, but we need list of graphics needed along with specifications and sizes
- Need button size recommendation (for application links)

Page Layout

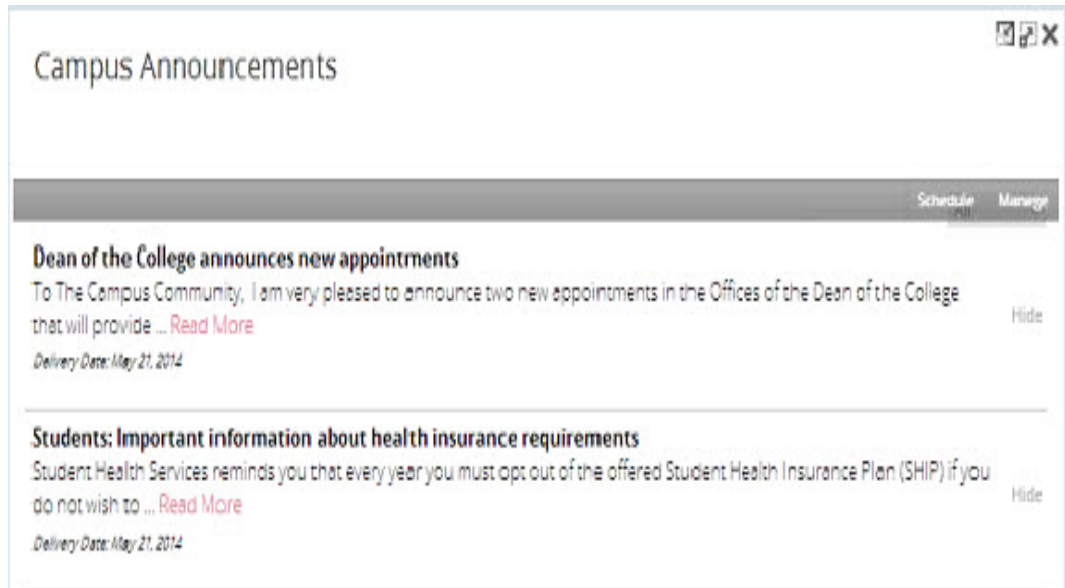

- BTC will want a custom page layouts (columns, rows) – (will provide sample)
- On delivered layouts there appears to be extra space when the row/column layout is used but no content is in the upper row. BTC would like this extra space to be eliminated. (doesn't collapse as we expected)
- Login Page
 - What graphic is needed? Size?
 - Need info/links for first time users/password recovery on the login page
- Logout Page
 - Design elements
 - Behavior (go back to login page)
- All pages/Header
 - Specifications for header graphic
 - Gray bar at top

- Name should read “Welcome, First Name” and should not be linked to the Manage my account portlet; should be smaller than the default size
 - Sign out link should be larger
 - Picture icon should be removed
 - Custom link wording for email and calendar links
 - Can bar be changed to another color or graphic?
 - Can icon/links be added in this space? (e.g. to public website)
- Can scroll bar be a different color or arrows added in space (like mobile applications)?

Portlets

- My courses portlet; can extra white space be tightened/eliminated? (will provide sample)
- Nested portlet
 - get rid of extra white space (will provide sample)
 - can title bar be eliminated?
- Present to her what Support said about the navigational Banner portlets and the white space and see if she knows of work around; support indicated that as link options are removed (via channel preferences/maintenance), they are replaced by white space – can this white space be eliminated? (will provide sample)
- Can spacing in ordered lists be changed (sample provided)
- Portlets headings changed to different size/fonts/colors?
- Can portlet CSS classes be developed to apply to portlets as needed?
- Calendar portlet
 - Can the default category view be changed for differing pages?
 - When a user changes default view of the page, can that choice “Stick” with the user for next login?

- Will BTC want any changes to how the announcement portlet displays? Below is a sample from another school.

Content

- Get BTC graphics complete before Alison starts (Angie, at BTC will develop graphics)
- BTC needs specs for certain graphics to prepare images for Alison

Miscellaneous

- FCK Editor: locking certain pieces down? Might just put guidelines in place.
